COP27 in Egypt

Date and Time: Monday, November 7 08:00 a.m. - 6:00 p.m.

Introduction

Addressing the climate crisis requires bold and rapid collective action

- Egypt's COP27 presidency vision is to move from negotiations and planning to implementation. Now is the time for action on the ground. It is therefore incumbent upon us to move rapidly towards full, timely, inclusive, and at-scale action on the ground.
- We need to harmonize our global efforts. If we are to meet our pledges and commitments words must be turned into action. Globally, the increasing frequency and intensity of extreme weather events is impacting the lives and livelihoods of millions of people. Rising global average temperature and rapid global warming are causing alarming consequences on human beings and all other forms of life on earth.
- In fact, the climate crisis will aggravate social, economic and environmental threats. Thus, urgent actions are needed to address the climate crisis and to strengthen the implementation of response with an aim to create a resilient planet.

- Our collective efforts to combat the adverse impacts of climate change are necessary/crucial if we are to secure a sustainable future for all.

Once again, we must implement now. Together we can succeed through just and ambitious collective action which leaves no one behind.

What is COP?

A defining moment in the fight against climate change.

Science has established beyond doubt that the window for action is closing rapidly. In November 2022, Egypt will host the 27th Conference of the Parties of the UNFCCC (COP27) in Sharm El-Sheikh, with a view to building on previous successes and paving the way for future ambition.

A golden opportunity for all stakeholders to rise to the occasion and tackle effectively the global challenge of climate change facilitated by Egypt on the African continent.

It is the 2022 United Nations Climate Change Conference

Egypt assumes the incoming Presidency of COP 27 with a clear recognition of the gravity of the global climate challenge and appreciation of the value of multilateral, collective and concerted action as the only means to address this truly global threat.

As we approach COP27, we are committed to support an inclusive, transparent and party-driven process to ensure timely and adequate action.

From Stockholm, Rio, Bali, Kyoto, Durban, Paris, Katowice, Glasgow to Sharm El-Sheikh

Global political will, supported by science heading to a paradigm shift through just and ambitious transformation.

IPCC has provided the credible science, successive COP decisions laid out the collective governmental actions, The Convention and its agreements outlined the principles, legal obligations and guidelines for collective action.

Recent IPCC reports have highlighted the gravity of the climate crisis and the need for immediate and sustained political will, impactful action and effective cooperation. Building on Glasgow's momentum, we seek to further enhance the scope of deliverables across the climate action agenda.

We believe there is a need for progress on the ground on all aspects of our work; mitigation, adaptation, finance, loss and damage.

We are aware of the challenges and the opportunities related to climate action, and the potentials and needs of all including those who are in vulnerable situations and the vulnerable communities and we stand ready to engage with all parties to accelerate climate action.

COP27 Legacy
Africa is determined to show its leadership in climate action through showcasing its contributions to global movement to tackle climate change, its role in facilitating and mobilizing action at scale, its vision for a just and sustainable future to its people and to the wider global population.

The hope is that COP27 will be the turning point where the world came together and demonstrated the requisite political will to take on the climate challenge through concerted, collaborative and impactful action. Where agreements and pledges were translated to projects and programs, where the world showed that we are serious in working together and in rising to the occasion, where climate change seized to be a zero sum equation and there is no more "us and them" but one international community working for the common good of our shared planet and humanity.

Partnerships for Future-proofing - Australian Pavilion COP27

Date and Time: Monday, November 14 02:00 a.m. - 3:00 a.m.

Address: EL Salam Road,Um Marikha Bay, South Sinai Governorate

Event day and time:

Water & Gender Day

14th November, 2022

5:00 - 6:00PM EEST

Duration:
Event summary:

Join us to explore the nexus between gender, climate change, water and WASH through an inclusive development lens.

To effectively address climate change, we must work towards changes in inequitable gender and social norms that hold us all back. Climate resilience depends on improved and inclusive water resources and WASH, improved water and WASH depends on good systems, good systems are made up of diverse people, and people are driven by norms.

Equitable access to WASH and WR is a critical building block for a climate-resilient future, it is also an opportunity for deep, transformative change within communities and institutions.

This solid foundation creates socially cohesive communities, equipped with the knowledge and tools needed to prepare for, respond, and adapt to climate change impacts. Strong partnerships support integrated systems that bring diverse stakeholders and sectors together to facilitate solutions for addressing climate risks and promoting climate-resilience.

This session will bring together important learning on partnerships and practice from across the water and WASH spectrums. Hear from diverse voices across the Asia Pacific, who will reinforce the pivotal role of inclusive water & WASH in achieving not only SDG6, but all Sustainable Development Goals and a climate-resilient future for all.

This session will take place in the Australian Pavilion at the Blue Zone of COP27, live streaming will not be available, but we will endeavour to provide a recording and you can catch live updates via our Twitter account @waterforwomen.

We are aware of the challenges and the opportunities related to climate action, and the potentials and needs of all including those who are in vulnerable situations and the vulnerable communities and we stand ready to engage with all parties to accelerate climate action.

**COP27 Legacy**

Africa is determined to show its leadership in climate action through showcasing its contributions to global movement to tackle climate change, its role in facilitating and mobilizing action at scale, its vision for a just and sustainable future to its people and to the wider global population.

The hope is that COP27 will be the turning point where the world came together and demonstrated the requisite political will to take on the climate challenge through concerted, collaborative and impactful action. Where agreements and pledges were translated to projects and programs, where the world showed that we are serious in working together and in rising to the occasion, where climate change seized to be a zero sum equation and there is no more " us and them" but one international community working for the common good of our shared planet and humanity.

**COP27 in Egypt**

Date and Time: Wednesday, November 16 08:00 a.m. - 6:00 p.m.

**Introduction**

Addressing the climate crisis requires bold and rapid collective action

- Egypt's COP27 presidency vision is to move from negotiations and planning to implementation. Now is the time for action on the ground. It is therefore incumbent upon us to move rapidly towards full, timely, inclusive, and at-scale action on the ground.
- We need to harmonize our global efforts. If we are to meet our pledges and commitments words must be turned into action.
- Globally, the increasing frequency and intensity of extreme weather events is impacting the lives and livelihoods of millions of people. Rising global average temperature and rapid global warming are causing alarming consequences on human beings and all other forms of life on earth.
- In fact, the climate crisis will aggravate social, economic and environmental threats. Thus, urgent actions are needed to address the climate crisis and to strengthen the implementation of response with an aim to create a resilient planet.

- Our collective efforts to combat the adverse impacts of climate change are necessary/crucial if we are to secure a sustainable future for all.

Once again, we must implement now. Together we can succeed through just and ambitious collective action which leaves no one behind.

**What is COP?**

A defining moment in the fight against climate change.

Science has established beyond doubt that the window for action is closing rapidly. In November 2022, Egypt will host the 27th
Conference of the Parties of the UNFCCC (COP27) in Sharm El-Sheikh, with a view to building on previous successes and paving the way for future ambition.

A golden opportunity for all stakeholders to rise to the occasion and tackle effectively the global challenge of climate change facilitated by Egypt on the African continent.

It is the 2022 United Nations Climate Change Conference

Egypt assumes the incoming Presidency of COP 27 with a clear recognition of the gravity of the global climate challenge and appreciation of the value of multilateral, collective and concerted action as the only means to address this truly global threat.

As we approach COP27, we are committed to support an inclusive, transparent and party-driven process to ensure timely and adequate action.

From Stockholm, Rio, Bali, Kyoto, Durban, Paris, Katowice, Glasgow to Sharm El-Sheikh

Global political will, supported by science heading to a paradigm shift through just and ambitious transformation.

IPCC has provided the credible science, successive COP decisions laid out the collective governmental actions, The Convention and its agreements outlined the principles, legal obligations and guidelines for collective action.

Recent IPCC reports have highlighted the gravity of the climate crisis and the need for immediate and sustained political will, impactful action and effective cooperation. Building on Glasgow's momentum, we seek to further enhance the scope of deliverables across the climate action agenda.

We believe there is a need for progress on the ground on all aspects of our work; mitigation, adaptation, finance, loss and damage.

We are aware of the challenges and the opportunities related to climate action, and the potentials and needs of all including those who are in vulnerable situations and the vulnerable communities and we stand ready to engage with all parties to accelerate climate action.

World Toilet Day

Date and Time: Saturday, November 19 09:00 a.m. - 6:00 p.m.

Did you know?

- Globally, at least 2 billion people use a drinking water source contaminated with faeces.
- Every day, over 700 children under five years old die from diarrhoea linked to unsafe water, sanitation and poor hygiene.
- For every $1 invested in basic sanitation up to $5 is returned in saved medical costs and increased productivity, and jobs are created along the entire service chain.
